

MWE enclosure

If ordered before 16:00, the wall enclosures can be delivered the following day (region dependant). The basic frame consists of a wall element with an integrated strain relief profile, four bars running front to back, two cable entry plates (top and bottom) and a set (2 pcs) of 19-inch profiles. The depth of the 19-inch profiles can be adjusted in steps of 50 mm. The cable holes always fit because the installation engineer can change their size on the spot thanks to the handy bend-away fingers. The 19-inch profiles have a pattern of holes on the side to allow accessories to be fitted. The casing consists of two identical upper and lower panels with ventilation slots at the rear, two identical side panels and a Securit glass door with an EK-333 cylinder lock with a handle.

Item code	Description	Unit	Height	Width	Depth	Colour	Weight	Construction depth	Maximum weight
446180	Single item	6 U	342 mm	600 mm	525 mm	RAL 9011	16 kg	0 - 470	100 kg
