Chemical/solvent resistance:

Samples of Silver Fox Legend™ laser tie-on cable labels were printed* with a standard laser printer. Samples were then conditioned for 24 hours at room temperature. Testing* consisted of 5 cycles of 10-minute immersions in the specified chemical/solvent followed by a 30-minute recovery period. After the final immersion, the samples were then rubbed ten times with a cotton swab dipped in the test fluid. Visual observations on the print quality are listed in the table to the right.
