

Protecting Finland's Electrical Infrastructure

Civil engineering contractor Oulun Energia Urakointi Oy – A Destia Company

have been introduced to Furukawa Green Trough cable management for the first time. Offering substantially easier solution for cable installation and maintenance for ground level cable routes than traditional cable burial methods. Simple onsite manual processing resulted in a time efficient and environmentally friendly installation perfect for future sustainable cable laying projects. Distributor Enkom Active supplied 34 m (68 units) of 430c series, 4 bends units and 4 end plates to the Oulu Taskila Water Treatment site, the largest water processing site in Northern Finland, where installation took place over week commencing 18th - 24th September 2021.
