

# 【New Product】 Introducing One-Click™ Cleaner PRO

As the PRO series of One-Click Cleaner,  
[One-Click™ Cleaner SC PRO](#)  
[One-Click™ Cleaner LC PRO](#)  
have been newly released.

While maintaining the features of One-Click Cleaner,  
PRO series has the characteristics of

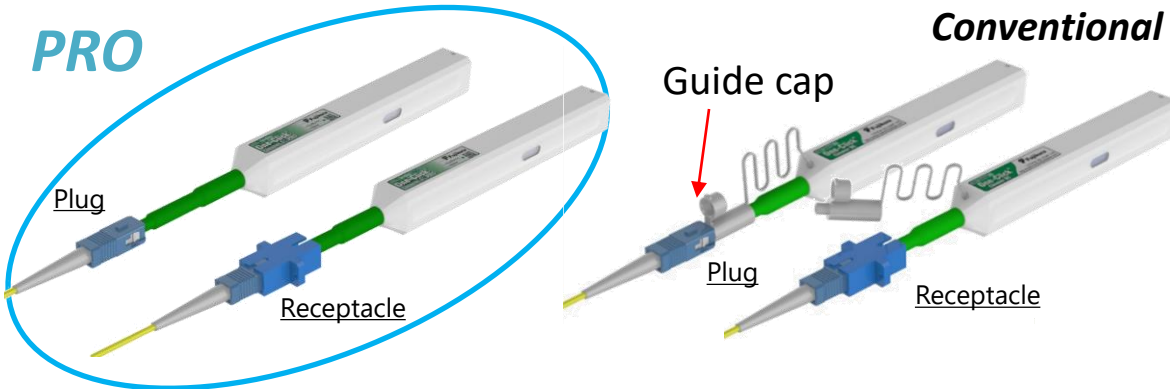

- **Guide capless**
  - ✓ Reduced cleaning time
  - ✓ Easier to work in narrow spaces and clean while holding other tools
- **Cleaning times approximately 1.5 times compared to conventional models**
  - ✓ 500 times → 775 times or more

# Features of One-Click Cleaner PRO

## 【New function】

### Point 1: Guide cap switching has been eliminated

It is not necessary to attach the guide cap when cleaning the connector plug. It eliminates the need to change guide caps due to repeated cleaning, reducing work processes and preventing mistakes in checking caps, which saves time. **(Approx. 45% reduction in operation time compared to our conventional products** \*According to our evaluation under certain conditions)

Not required to attach guide cap

Required to attach guide cap

In addition, work simplification makes it easier to work in narrow spaces and clean while holding other tools.

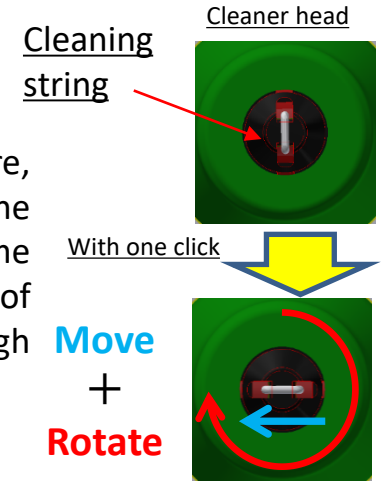

## 【New function】

### Point 2 : Increased number of cleanings

While adding/maintaining the listed functions, we have improved the number of cleanings **(about 1.5 times compared to our conventional products)** by improving the internal structure of the cleaner.

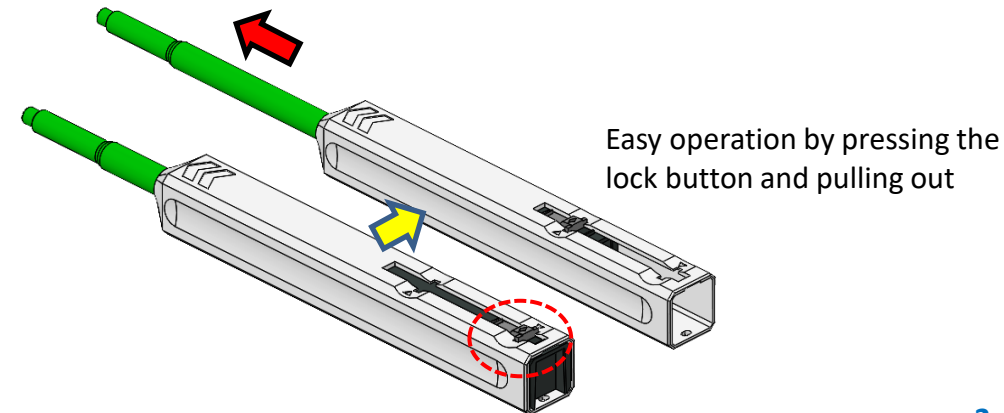

### Point 3 : High cleaning performance

Keeping Fujikura key conventional cleaning feature, with one click, the cleaning string at the tip of the cleaner "moves" and the head "rotates" at the same time, removing grease and dust from the end face of the optical connector. This mechanism achieves high cleaning performance.

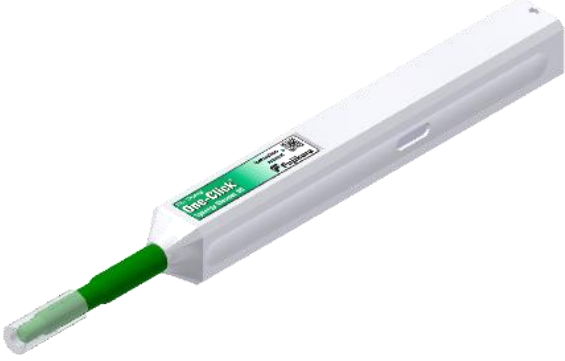

### Point 4: Compact/Extendable Nozzle

Multifunctional yet compact with W17.5 x H17.5 x L185. Easy to carry due to its size. In addition, the cleaning nozzle can be expanded and contracted just like Fujikura conventional product, making it easier to clean by extending the nozzle even when cleaning in an environment where wiring is densely packed.

# One-Click™ Cleaner PRO Specifications

	Product name	One-Click™ Cleaner SC PRO
	Model name	SCPRO-CLK-A
	Colour	Green
	Applicable connector	SC connector
	Dimensions (mm)	W17.5 x H17.5 x L185 (with nozzle extended:L220)
	Cleaning times	775 times or more
	Cleaning method	Dry cleaning

	Product name	One-Click™ Cleaner LC PRO
	Model name	LCPRO-CLK-A
	Colour	Blue
	Applicable connector	LC connector
	Dimensions (mm)	W17.5 x H17.5 x L185 (with nozzle extended:L220)
	Cleaning times	775 times or more
	Cleaning method	Dry cleaning

Shaping the future with “tsunagu” technology.
