

MJET V0

JETTING MACHINE FOR CABLES 0,5-6MM IN DUCTS 3-16MM

- Electric traction drive, supplied from the attached battery
- Permits jetting in larger tubes with smaller compressor unit, the motor doesn't consume any air flow
- Electronic cable protection, if a stop or slip is detected the drive stops within 250 ms.
- Reduced stress on the cable due to settable traction force
- OLED display shows speed, current progress and cable pushing force.
- Maximum speed 250 m/s, 60 N pushing force.
- Variable clamping force on cable

Technical data:

14.4 Volt std Hitachi battery

Max press. 16 Bar

0,5-6 mm cable diameter*

3-16 mm duct diameter

Weight ~ 2 kgs

Dim:120x220x170mm

MADE IN SWEDEN
